

ALTON

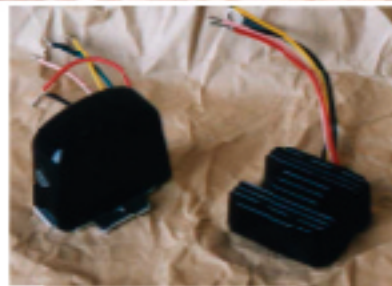

12 V Alternating-Current Generators (alternators) for classic motorcycles

ALTON

The Altons are 12V alternating-current generators specially designed to replace 3" diameter dynamos on classic motorcycles.

- ◆ Maximum output of 150 Watts, 12 Volts. High output at low speed to balance electrical component consumption while maintaining the battery well charged.
- ◆ Brushless permanent magnet generators.
- ◆ Supplied with rectifying-regulator (negative earth).
- ◆ 2 year replacement guaranty.

Available models :

- Vincent twin
- Vincent Comet
- Velocette single
- Triumph pre-unit
- BSA A7 and A10 (supplied with V-belt drive kit)
- Magdyno generator
