MOTORCYCLE PARTS AND ACCESSORIES

IGNITION COIL

MOTORCYCLES and SCOOTERS

Specifically developed for motorcycles and scooters by British engineers with over 50 years experience in the ignition industry — varnish-impregnated under complete vacuum by a revolutionary new manufacturing process — outstanding performance assured — lasts much longer even under excessive and sustained vibration — lightweight — easily installed even on the most compactly built machines — guaranteed to provide sustained higher electrical output over a wider speed range.

MOTORCYCLE PARTS AND ACCESSORIES

THE TORPEDO

*Distinctive
Sidelight*

Beautifully finished in polished chrome — extra strong, rust-proofed cast body — red "pip" on top lights up — ample length of lead cord — simply installed. A "must" for individualized machines and cars.

PART NO. EIW 3030

(Exactly as illustrated above)

LIST PRICE\$2.75 each

PART NO. EIW 3010

(with molded rubber base, not pictured)

LIST PRICE\$3.25 each

THE WIFLEX

*Rearview
Handlebar
Mirror*

Eliminates unsightly arm-and-bracket mounting — simply screw tapered thread on mirror arm into end of 7/8" handlebars — flexible, self-aligning mounting — weatherproof — flexible joint flicks mirror back into original position if accidentally bumped. Add **safety** to your machine — see behind you without turning your head.

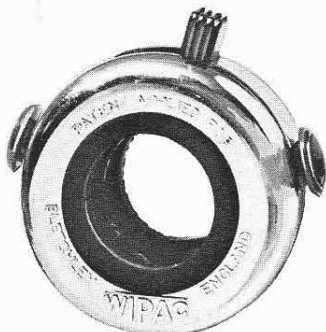

PART NO. EIW 3011 . . . R.H. Mirror

PART NO. EIW 3011A . . . L.H. Mirror

LIST PRICE3.95 each

THE TRICON

*Revolutionary
Handlebar
Switch*

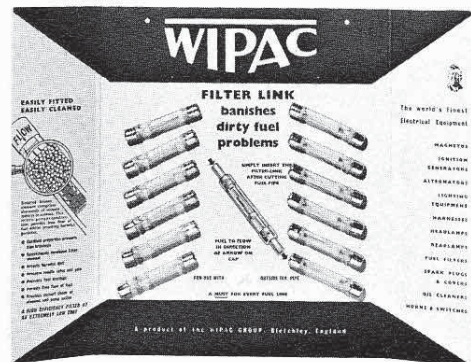

Combines 3 controls in one compact unit: **Hornbutton, Dimmer Switch and Engine Cut-out** — all three controls right at your finger tip — Dimmer Switch has "carry-over" contact exclusively designed to prevent "blowing" bulbs. A "must" for practical, safe driving.

PART NO. EIW 7020

LIST PRICE2.95 each

THE FUEL FILTER LINK

*The Most
Highly Efficient
Visual Filter*

Prevents flooding — saves fuel — stops power-robbing dirt from getting into fuel system — simply "push on" to the opened fuel line — a product of modern filter techniques developed over many years of research — ultra long life — transparent to let you watch its filtering action.

PART NO. EIW 8080 1/4" diameter

PART NO. EIW 8090 5/16" diameter

PART NO. EIW 8095 1/4" diameter, 12" long

LIST PRICE\$1.50 each

MOTORCYCLE PARTS AND ACCESSORIES

THE DIAKON MK II

Superb Styling

for

Modern Machines

All rear lighting requirements in one contemporary designed unit—all (3) bulbs exposed when lens removed—use of 3 bulbs instead of multi-filament bulb means less expensive replacements—can also be used on cars and trucks.

Part No. EIW 3001
List Price \$4.25

THE DIAKON MK I

*Toughest —
Most Brilliant
Stop and Tail Light*

New streamline design—bulb combination (3) provides a positive safety factor—3 flexibly mounted bulbs rather than one multi-filament bulb ensures longer life and less expensive replacement—rubber covered snap connectors will not allow leads to become detached from vibration.

Part No. EIW 3005
List Price \$4.15

THE DIAKON MK III

*Generous
"All-Round"
Lighting*

Lens of tough Diakon is 2" diameter—rear light, reflector and stop light—makes bulb changing easy since entire backplate exposed when lens removed—twin screw type bulbs utilized.

Part No. EIW 3003
List Price \$2.50

THE UNIVERSAL

*Providing
Unfailing
Service*

Completely weatherproof—easily installed—all normally exposed parts and terminals covered—extra terminal provided for an additional connection—the finest complete unit on the market.

****NOTE:** As part of the unit but not pictured are brackets and all hardware to make the switch completely adaptable to all machines.

Part No. EIW 9035
List Price (Complete**) \$1.95

IGNITION EQUIPMENT

'CHARGEMOBILE' Mobile Battery Charger

SERIES 174

Attached to the bulkhead of a car or commercial vehicle, or to the frame of a motor cycle or scooter, the CHARGEMOBILE is ready for use—Anywhere—At anytime.

Charging your battery is a simple operation—Two leads from the CHARGEMOBILE are attached to the battery terminals and a further lead is connected to the main's supply similar to any domestic appliance—Switch on and your battery will receive 1 to 1½ amps. even and beneficial charge at the economical rate of approximately 20 hours for less than a penny! Used occasionally overnight your battery and electrical equipment will be kept in tip-top condition with no inconvenience.

The CHARGEMOBILE works automatically and is perfectly safe—No dials to watch—No regulating required—OIL-FILLED for long life. 6 or 12 volt charging is selected by a two-pin "change-over" plug which also incorporates a safety fuse. A standard bracket makes it easy to fit and no alteration is required to existing wiring on the vehicle. **It is important that the CHARGEMOBILE must be earthed through the terminal provided on the mains plug.**
