MEASUREMENT OF FLEXIBLE DRIVES

The length of the Flexible Drive is measured over the abutment faces of the outer casing end-fittings, as shown by the dimension 'X' in Figures 1 and 2. The lengths of flexes given in the column headed 'Length' in the recommendation list correspond to this dimension and are as marked on cartons containing complete flexes or inners only. The actual length of the inner should be ignored, as this varies considerably with the type of flex.

WHEN ORDERING FLEXES IT IS NECESSARY TO STATE THE CODE NUMBER AND LENGTH GIVEN IN THE RECOMMENDATION LIST.

INNER FLEXES OF THE NYLON SLEEVE AND BRASS BUSH TYPES ARE NOT INTERCHANGEABLE.

ABBREVIATIONS USED IN RECOMMENDATION LIST
