THIS List shows in consecutive order Parts which are peculiar to 3.49 h.p. 1925 Machines and which are therefore not interchangeable with the 1925, 1926 or 1927 Models.

It will be observed that a number of Parts are marked thus (\*) and this signifies that a revision has been made in the main 3.49 h.p. 1925-27 Spares List affecting either price, description, or interchangeability.

We do not show illustrations in this List but any particular Part may easily be traced if reference is made to the illustration in the main 1925-27 List.

Parts there illustrated have one number only and this acts as a key number, since all Parts having a similar designation are grouped together in the descriptive pages.

### SPECIAL NOTE FOR AGENTS ONLY.

A List on similar lines to the above has been published for the 1928 4.98 h.p. Models, and a completely revised 6 h.p. and 7.99 h.p. List having ENTIRELY NEW PART NUMBERS is in course of print.

In addition to showing interchangeability of Parts in respect of 3.49 h.p. 1928 machines we give in their respective columns, the interchangeability of any particular part with the 4.98 h.p. and 7.99 h.p. Models.
