

WE ARE OFFERING A £10 PRIZE

for the best suggestion for further tests of the Matchless "Super Clubman." Send the Coupon below for copies of the reprints of "The Motor Cycle" and "Motor Cycling" reports and an entry form containing some helpful suggestions for your guidance in making your test suggestion.

TEST COMPETITION NOW CLOSING

If you have not already entered; send in your suggestion before March 31st, when the competition will close.

The

MATCHLESS

SUPER CLUBMAN

In the issue of "Motor Cycling" dated January 5th, 1938, appeared a description of a special Road Test of the 500 Super Clubman. In this strenuous test a Model 38/G90 ran for 1,001 miles without stopping the engine, and afterwards was tested for speed against the stop watch. The non-stop 1,001 miles was covered in just over 24 hours at an average speed of 40.6 m.p.h., including all stoppages for refuelling, change of riders, etc. "Motor Cycling" summed up the performance of the Super Clubman after 1,000 miles without stopping as follows:

"Everything—engine, gearbox, ignition, lighting, tyres, wheels, frame—everything behaved splendidly and the riders were full of praise for a mount THE VIRTUES OF WHICH WOULD BE DIFFICULT TO EXAGGERATE."

The 350 Super Clubman was reported on by "The Motor Cycle" in the issue of January 6th, 1938. After a strenuous test "The Motor Cycle" said of the Model 38/G4:

"One cannot help falling completely for its charming ways. The surge of power coupled with the flexibility and exceptional mechanical silence of this engine is indeed fascinating."
