15th March, 1954.

**BATTERIES**

All Motor Cycles of our manufacture are now fitted with dry charged Batteries, which require only to be filled with acid of the correct specific gravity to be ready for use.

Although all Batteries are clearly labelled with filling instructions, cases have already occurred of machines being started with dry Batteries, with consequent damage to the electrical equipment.

It is stressed that all Batteries require filling before any new machines are started, but if the filling instructions provided are followed out, trouble of the type that some Dealers have already experienced, cannot occur.
