1956 COMPETITION SINGLE MODELS

It has been found that the best performance can be obtained from the Competition Singles with an overall exhaust pipe length of 42 inches, measured from the edge of the port flange at the center line of the pipe. Because of this, the Competition Singles are not equipped with an exhaust pipe extension.

We now have available, Aluminum Air Cleaners with the Fram type element, for 1956 500cc Competition Singles, only. These Air Cleaners sell for \$10.50 less the usual dealer discount.
