

A. J. S. 1957 MODELS - continued:

The full list is formidable and involves new petrol taps, moulded rubber battery retaining strap, detachable tool box lid, modified rear mudguard, primary chaincase oil seal at rear of clutch and point of attachment to the crankcase, improved rear chainguard, etc., etc.,

Arrangements have been made for details of the 1957 Models to be released in the Technical Press on the 27th September and reprints of the more important articles will be forwarded as soon as they are available.

With the introduction of these new but well tested features coupled with a highly successful year in the racing and competition field, 1957 is looked forward to with confidence.

We take this opportunity to thank our many Home and Overseas trade friends for their loyal support during the past season and to assure you of our continued support during 1957.

Yours faithfully,

A. J. S. MOTOR CYCLES.
