Introduction to the First Edition.

December, 1990

This desire of mine to know obscure facts about our beloved Plumstead products has led me to do silly things at times. Probably the silliest was to wonder whether the AMC part-numbering system was truly numeric. This eventually resulted in a numerical listing of parts, including the model using them and the years involved, which ran to two ring-binders of A4 sheets. At the time this was an exercise with no other purpose than to satisfy my own curiosity but it proved invaluable to Pat and Ron Hughes in their seemingly never-ending struggle to help us keep the bikes on the road. I'm sure that Ernie now finds it equally useful. Along with this, though, I began to make notes of colour schemes and it is that part of the work which is contained here.

I have not been able to complete the job since I have not had access to all of the Spares Lists. I have none for the hybrids nor any for 1966 or 1967. For the rest, I have tried to use my experience to infer some of the missing items but anything of which I am not completely sure is shown in italics. I have tried to cross reference all of the part numbers against various uses on different machines but you may well find that the same number is used on, say, twins and singles in the same year but that a reference is shown on only one. Some styles are used for several years so it is worth looking at years near to your own. As it is, I have taken well over two years (on and off) to get this far!

You will find that the number of sections increases as the years pass. This is because those items not normally mentioned are painted black and the only times that a black version is mentioned specifically are when there is lining or when there were alternative colours. One item which should be mentioned is the frame cover between the oil tank and tool-box. Although the slab-sided style was introduced in 1956 the cover does not appear until 1957. It is invariably black, whatever the tank colours, until 1962 when it takes the colour, too.

Mentioning colours, I would like to have been able to give modern equivalents but I have not been able to get all of them. The ones I know are:

- Matchless chrome tanks with three panels to 1956 - Ford Red
- Matchless G11 in 1956 - colour unknown *but probably Ford Red*
- Matchless maroon 1957 to 1961 - BMC Damask Red
- Matchless off-white - BMC Old English White
- Matchless Tartan Red - Vauxhall Monza Red
- AJS Dove Grey - Peugeot Pompadour Grey (Gris Pompadour)

After 1962, the colours become more variable as the factory struggled to keep going and they were less careful about matching batches.

Several times AMC fitted different petrol tanks to their machines across the range. In the early 50's the AJS twins carried a bigger tank than the rest. In the mid-50's, 500 singles got a larger one than the 350's which used up old stocks. This applies to other parts as well. For 1957 only the 350 singles use a different *frame* which was basically the 1956 Jamptot chassis modified to take clevis-bottomed Girling units. This gives a one-off seat and oil tank. It makes restoration more interesting, I suppose.....

At the back of this booklet you will find two Appendices, one for transfers and the other for twinseats. They are in the style of the numerical parts list, giving the years used and any model restrictions. I was amazed at the number of seats which are listed and it goes some way to explaining why most pattern ones don't fit! Many can be modified. The 1959 G9/G12/20/31 seat and the 1960 to 1963 touring seats use the same sized pan as the 1957 (500)/1958 all/1959 single only seat with the exception of a support for the "nose" which covers the gap at the back of petrol tank on the latter models. The former models have the larger, rounded tank without the cut-away to the rear, originally there to allow use of a saddle. The 1956 seat and 1957 (350) seat is also the same length as the above but the front mounting is in a different place and its through-bolt is a smaller diameter.

A note of caution for foreign readers: this was compiled from UK lists and we all know that there were differences for some overseas markets, especially late 1960's American models. If anyone cares to help plug these gaps or correct any false information, please contact me as soon as possible. I plan to make up-date sheets available from time to time as the new information becomes available.

There are references contained in the text, giving details of photographs of a particular style. The books used were:

**British Motorcycles, Volume 1. Steve Wilson. Patrick Stevens Ltd.
ISBN 0 85059 516 9**

**AJS and Matchless - the post-War models. Roy Bacon. Osprey.
ISBN 0 85045 536 7**

Matchless. Peter Hartley. Osprey. ISBN 0 85045 404 2

**Matchless and AJS post-War Road Singles and Twins - Restoration.

Naturally, I hope that you find this book useful. However, for the vindictive out there, I have to put in a disclaimer. I have undertaken this work on a voluntary basis with limited access to documentation. I believe that most of what is written is correct *but all of it will not be*. I accept no responsibility for any discrepancies in this document and I warn all users to expect errors. The factory were not immune. Some options for the 1962 Matchless range being listed in the AJS lists, for example, so I am sure that I cannot be any better. I have tried to give as many ideas of reference photographs as possible so go and check before you start. If you find an omission or a mistake, don't write to Classic Bike or The Gun. Start by writing to the Jampot so that others will learn of the error. Then make sure that I know so that I can correct it.

Technical details: I produced this on an Atari STFM computer, with 2.5 Mbytes of memory, using the Timeworks DTP package. The font is Century, as supplied by the ST Club in Nottingham, and the pages were printed on a Star LC 24-10 printer at 360 dpi.

Keith Jackson, Spondon.

Well, you know how it is! I thought that I had completed the book, as far as the first edition went, and I was looking forward to getting it into print in early 1991. Then Nick Daniels heard that I hadn't got hybrid details and lent me a 1964/5 parts list and, after I had run off all of the sheets, I bought a Norton-Villiers list for 1966 to 1968. Each page takes 30 minutes to print on my set-up so I decided against doing it all over again just to correct the header date from 1965 to 1968. The last spares list is very sparse in detail and I have very little photographic information so the nett result is something less than the rest. If you can help fill in the gaps, please let me know.

1. War Department to Early 1946

□ Matchless G3/L and G80

There was a batch of G3/L machines being readied for the Asian zone at the end of World War II. These were repainted to form the first batch of civilian machines and were released in August 1945. (ref Motor Cycling pp170/1 5 July 1945). By early 1946 the design changed to that given for 1947 (see period advertisements).

○ Petrol tank :

010894 - black with a single, broad stripe around the entire edge of the tank sides in a similar style to the 1959-on trials machines. This had a single black pinstripe along the centre. The tank was fitted with the 011051 transfer. (Ref Jampot, issue 431, January 1989)

○ Rims :

Enamelled plain black - no embellishment.

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ AJS 16M and 18

○ Petrol tank :

010893 - black with gold broad and narrow stripes arranged in the 'D' fashion. The tank was fitted with 010969 (=009194) transfer. (ref Restoration pp34/163 [comp options] & pp93/202)

○ Rims :

Enamelled plain black - no embellishment.

○ Transfers:

009183, 009184, 009185, 009186, 010969 (3) (=009194), 012973 (=009195).

2. Mid-1946 and 1947

□ Matchless G3/L and G80

○ Petrol tank :

011886 - black with single broad stripe in 'D' fashion with a single blue pinstripe in the centre. The tank was fitted with a chromed, winged 'M'. (ref Hartley, pp135 & Restoration pp12, 118).

○ Rims :

012219/20 - chromed, black centre and silver lines.

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ AJS 16M and 18

○ Petrol tank :

010893 - black with gold, broad and narrow stripes arranged in the 'D' fashion. The tank was fitted with 009194 transfer. (ref Restoration pp13).

○ Rims :

012217/18 - chrome, black centre and gold lines.

○ Transfers:

009183, 009184, 009185, 009186, 010969 (3) (=009194), 012973 (=009195).

3. 1948

□ Matchless G3/L and G80/L

○ Petrol tank :

011886 - black with single broad stripe in 'D' fashion with a single blue pinstripe in the centre. The tank was fitted with a chromed, winged 'M'. (ref Restoration pp88).

012537 - chromed with three red panels. Each panel had a *single broad silver stripe with a red pinstripe*. The tank was fitted with a chromed, winged 'M'.

○ Rims :

012219/20 - chromed, black centre and silver lines.

012875/76 - chromed, red centre and silver lines.

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ Matchless G3/LC and G80/LC

○ Petrol tank :

011886 - black with single broad stripe in 'D' fashion with a single blue pinstripe in the centre. The tank was fitted with a chromed, winged 'M'.

○ Rims :

011693/4 - plain chrome

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ AJS 16M and 18

○ Petrol tank :

010893 - black with gold, broad and narrow stripes arranged in the 'D' fashion. The tank was fitted with 009194 transfer.

012538 - chromed with three black panels. Each panel had a *single broad silver stripe with a blue pinstripe*. The tank was fitted with 009194 transfer.

○ Rims :

012217/18 - chrome, black centre and gold lines.

012219/20 - chrome, black centre and silver lines.

○ Transfers:

009183, 009184, 009185, 009186, 010969 (3) (=009194), 012973 (=009195).

4. 1949

□ Matchless G3/L and G80/L

Some spring-frame singles were available in 1949. They use the same transfers as the twin. Comp. models used optional parts but were generally similar to the roadsters. (ref Restoration pp14)

○ Petrol tank :

014615 - black with single broad stripe in 'D' fashion, a *single blue pinstripe in the centre* and a chromed, winged 'M'. (ref Bacon, pp30-1).

014614 - chromed with three red panels. Each panel had a broad silver stripe with a red pinstripe and a second, silver pinstripe inside the first. The tank was fitted with a chromed, winged 'M'. (Restoration, pp17)

○ Rims :

012219/20 - chromed, black centre and silver lines.

012875/76 - chromed, red centre and silver lines.

○ Transfers :

009183, 009184, 009186, 009187, 009188 (2), 009189, 009192, 012973 (=009195), 015282 (=009196).

□ Matchless G3/LC and G80/LC

○ Petrol tank :

011886 - black with single broad stripe in 'D' fashion with a *single blue pinstripe in the centre*. The tank was fitted with a chromed, winged 'M'. (ref Restoration, pp195).

○ Rims :

011693/4 - plain chrome

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ Matchless G3/LC and G80/LC

○ Petrol tank :

011886 - black with single broad stripe in 'D' fashion with a *single blue pinstripe in the centre*. The tank was fitted with a chromed, winged 'M'.

○ Rims :

011693/4 - plain chrome

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

○ Rims :

011693/4 - plain chrome

○ Transfers:

009183, 009184, 009186, 009188, 009189, 009192, 012973 (=009195)

□ Matchless G9

○ Petrol tank :

014614 - chromed with three red panels. Each panel had a single broad silver stripe with a red pinstripe and a second, silver pinstripe. The tank was fitted with a chromed, winged 'M'. (ref Wilson pp79)

○ Rims :

16. 1962

For 1962 only, options were available for **any** touring frame part to be painted either Matchless red or AJS blue, down to things like the stands, engine plates or Girling top-covers. They are not detailed here as they are simply options. Touring tanks are 1960/1 leftovers but modified to take the cast badges. This left no room for the normal knee-grips so the smaller, lightweight type were used instead. If you dismantle one you can see the holes for the earlier knee-grips and tank badges! The G3 and 16 'S' variants also have a chromed rear-chainguard. (ref Restoration, pp183). The G15/45 twin is shown in Restoration, pp26.
